

DAHUA CCTV System Playback quick guide

To start **PLAYBACK**

Right click using the mouse provided anywhere on the CCTV system monitor screen

A small MENU window will pop up on your screen

Scroll down to SEARCH and left click on it, if you are prompt to enter a password and a swipe type keypad appears click on SWITCH USER and a new password text box will appear on your Screen, the username is already there as "admin" once you cleft click on the text box under the username text box a small keyboard will pop up, enter your password and click ENTER & then OK, now you are in the PLAYBACK Screen.

Left click on the date you want to playback from the calendar box on top right corner of the current screen

Select the camera/s you like to playback from the option right underneath the Calendar (You can choose to playback1, 4 or all cameras)

On the bottom of the PLAYBACK Screen you will find the time bar ,double click the desired time (0-24 Hours) you want playback and the playback will start

You can playback the recorded video footage by using the Fast / Slow broken arrow icons located above the time bar

When you finish playing back keep on right clicking until it takes you back to live screen.

Backup recording on to a USB Storage device

Insert a USB stick in to the USB port in front of the Digital Video Recorder

Right click using your mouse anywhere on the LIVE view screen

A small MENU screen will pop up on your screen, left click on MAIN MENU

A larger MENU will now appear on your screen, top right on that menu there is an icon called BACKUP, left click on it

On the new window that pops up select the START & END dates & times you like to save on the USB storage device and then select Channel number (That is the camera number) eg Channel 4 is Camera number 4)

Now select video format as ASF (This option is right under the channel number text box) and now click "Add" all the files found will now be place in the open square box and are ready to be saved on to the USB storage device

The system will show all available files found for the selected date & time , Click BACKUP and the backup process starts, when completed a messages will show that backup is completed.

Remove USB storage device from the Digital Video recorder
